Aavenir

Strengthen Source-to-Pay Orchestration

on the ServiceNow platform with a native sourcing application

Aavenir RFPflow is pre-integrated with ServiceNow **Source -to-Pay** Operations (SPO) and delivers complex RFx management within a single system of engagement. By bridging the gap between RFx request and award, RFPflow eliminates manual sourcing initiation and award handover touchpoints, fragmented visibility, and data duplication common with off-platform sourcing solutions. It synchronizes vendor responses directly into SPO, and provides real-time, centralized visibility into sourcing progress within SPO. This "Built on ServiceNow" integration transforms procurement into a strategic engine - all without third-party application connectors or complex integrations.

Benefits

Native ServiceNow Integration

Eliminate the need for third-party application connectors or complex, time-consuming implementations by utilizing a solution built natively on the Now Platform.

Accelerate Sourcing Cycle Time

Accelerate the process from intake to award by removing data silos and manual metadata entry between disconnected sourcing tools and the ServiceNow platform.

Achieve Accuracy & Compliance

Mitigate risk and ensure total adherence to corporate governance and legal standards through automated, audit-ready workflows that never leave your secure environment.

Maximizing Realized Savings

Leverage advanced AI to identify optimal split-award scenarios and benchmarking data, ensuring procurement teams consistently hit & exceed Saving targets.

One-Click Award & Contracting

Seamlessly convert winning bids into legal agreements using integrated CLM capabilities, ensuring the "Source-to-Contract" loop is closed in seconds, not weeks.

Aavenir

ServiceNow Source-to-Pay Operations Value Boosters

Native RFx Orchestration

Instantly launch RFI, RFP and RFQ events directly within the ServiceNow SPO workspace, maintaining a consistent UI and single data schema.

Intelligent Information Exchange Across SPO & RFPflow

Eliminate manual entry by automatically sharing line items, requirements and sourcing request information from SPO to pre-fill RFx drafts and technical specifications.

AI Bid Evaluation & Recommendation

Instantly launch RFI, RFP, or RFQ events directly within the ServiceNow SPO workspace, maintaining a consistent UI and single data schema.

Synchronized Awarding & Performance

Real-time integration ensures that when an event is awarded, sourcing requests and line items in SPO are updated instantly, enabling "one-click" contract generation from SPO.

Configuration Flexibilty

Unify the handoff from request to RFx by customizing trigger workflows that precisely map ServiceNow SPO fields and line items into Aavenir templates. The integration framework supports complex, industry-specific questionnaire and pricing templates to accelerate the creation sourcing events.

Strategic Outcomes: Delivering Measurable Impact

50%

Reduction in Sourcing Cycle Time

Move from business request to vendor award in half the time compared to fragmented sourcing tools.

100%

Auditability & Policy Compliance

Achieve bulletproof compliance by eliminating mismatched terms and pricing across systems.

15%

Average Increase in Cost Savings

Identify hidden value through AI-powered vendor comparisons and optimized award allocations.
